FRIDAY, April 13-P. M.

Gold closes at 1961, and cash o In Government stocks the sales were moderate at the prices of yesterday, with the exception of 10-40s, which closed at In State Bonds little done and no speculation. Ohio and Mississippi certificates were active and rose to 261. cash, and 26, seller 60. Canton Co. was strong and sold up to 532. Quicksilver Mining Co. was very active and wanted at 50. The general share market was strong, and in many cases higher rates were paid. Reading was specially firm and sold at 104, cash, freely. Speculation is wholly confined to cliques, and the outside public is hot disposed to venture, though money is abundant, and brokers ready for business on account of customers with courage and good margins. The closing prices were: Rold. 1264 21267: Ohio Certificates, 26 267: Canton, 52 *521; Cumberland Coal, 441 #442; Quicksilver, 501 @ 507; Mariposa, 124 @122; Mariposa Preferred, 224 & 224; New-York Central, 92; 293; Erie, 73] 273]; Hudson River 1094 @1094; Reading, 1047 @105; Michigan Central, 103 2 105; Michigan Southern, 804 2 802; Cleveland and Pittsburgh, 801@802; Cleveland and Toledo, 111@ 111; Rock Island, 118; 2118; North-Western, 26] 2 262; do. Preferred, 551 2552; Fort Wayne, 911 2914.

Money on call is abundant at 5 and 6 per cent, and leading houses are paying off 5 per cent loans from inability to use the money. Commercial paper is quoted at 7 per cent, and cases are rare where less is taken. Good names are held at 8 and 9, and ordinary at 10 and 15 percent. Call loans are still preferred by lenders to long engagements, no matter how tempting the rate of interest is made. The Secretary of the Treasury has the loan bill signed, and at no remote day will be at work under it, and give more firmness to the money market. Prudent people show no disposition to make new engagements until the Secretary's policy is known. That he will have a settled policy is now to be expected from the tenor of the bill, or from his antecedents. In the future, as in the past, he will move secretly, in any direction, for the inserest of the department, and the money market will be kept in a condition fatal to gamblers, whether in stocks or commodities. He will pursue a policy which will make money on call abundant at low rates, and ordinary commercial paper command prices equal to those paid for the last six months. This course will make compound notes, 7.30s, and all short Government paper the most desirable security in which to employ capital until the Government funds its currency debt and withdraws from the market as a borrower in any form.

Exchange is quoted 1074 @ 1074 for prime bills at 60 daysthe latter an extreme rate. Francs, 5.231 a5.214 for long, and 5.20 a 5.17 for short. The large importations of 5-20s -of which exclusive information came to one of our neighbors does not improve exchange, advance gold or depress 5-20s materially.

In Freights, the engagements to Liverpool are: 100 bales Cotton at \$\frac{1}{4}d., 7,000 bush. Corn on private terms, and, per steamer, 150 bales Cotton at \$\frac{1}{4}d.\$ To London, 22,000 bush. Corn at 5id. To Glasgow, 15,000 Staves at 15/. A ship with Deals, from St. John's to Glasgow, on private terms.

The business of the Sub-Treasury was: Receipts, \$2, 764,627 60-for Customs, \$463,000; Payments, \$1,517,010 80-on account of Loan, \$34,000; Balance, \$88,505,880 44. Gold notes, \$440,000.

A dispatch from Washington says: "An attempt will probably be soon made in Congress to compel the National Banks to redeem their issues in New-Nork."

This change in the banking law is desirable, and will do much toward restoring the currency to an equality with coin. The country banks, under such a change, could not

Beep out anything like their present volume of money, and would be all the safer for it.

The annual reports of rallway companies afford very curious facts, of which the following examples are from the Pittsburgh and Fort Wayne last statement. The reports of 1864 and 1865 give among the items of incom-

upon the 1st of each month the price of the shares sold as follows: 1864. 1865. 1864. 1864. 1864. 1864. 1869. 1879.

19934 11524 Including January and February, 1864, the average price of the stock was 112 for that year, but with an average of 1071, the managers were only able to get par. In 1865, with an average of 96 at the Stock Exchange and only three months in which par could be had, one hundred cents on the dollar was obtained. It would be interesting to see the exact terms and price at which this

stock was sold, and if sold by private sale who got the bargains, in 1864, and who were the friends of the road

The carnings of the Eric Railway (including Buffalo Division) for the month of March were: 1865...\$1,331,124 90 | 1866...\$1,070,434 49 | Dec..\$260,690 41

These figures are not encouraging to owners of railway shares, but they are as favorable as will be shown during the current year.

The Cincinnati, Hamilton and Dayton Railroad has

declared a semi-annual dividend of four per cent.

declared a semi-annual dividend of four per cent.

The Chicage Tribune of Wednesday, says:

There is nothing new to note in the condition of the money market, only that our bankers are still losing currency, and the market is gradually becoming more stringent; but the demand is generally met at the discount houses. First-class paper is discounted at ten per cent per manum, but inferior grades are discounted at 122 per cent per month by private bankers and street brokers. Eastern exchange is very scarce, and the market is firm at par buying, and 1-10 premium selling. Round lots of bankers exchange were sold at a premium of 60-70c, per thousand. The demand to-day was quite active.

There was a materate demand for money, and the market.

The Cincinnati Gazette, of Wednesday, says:

There was a moderate demand for money, and the market was tolerably easy at \$\tilde{v}_{0}\$ inside, and \$10\tilde{v}_{0}\$? In the open market, for good paper. There was a firm market for exchange, but dealers were able to supply if without shipping currency. Gold was unsettled, but there was a good demand at the rates. In our market there was nothing of consequence done in gold bonds to-day. There was a fair demand for Seven-thirftes, with moderate offerings, and the market was steady. The orders to buy were chiefly from the interior.

MAYOR'S OFFICE.

Meeting of the Street-Cleaning Commissioners. At 9 o'clock yesterday morning the Street-Cleaning Commissioners met in the Mayor's Office.

The Controller presented a letter from the contractors dated April 12, 1866, stating the difficulty attending the dumping of manure, &c., at the foot of Vesey-st., caused by the number of farmers', butchers' and other wagons in the street; asking additional dumping facilities in the ward, and specifying particularly where other dumping facilities, new dumbing boards and repairs, were re-

on motion of the President of the Metropolitan Board of Health, the letter was referred to the Controller to ascertain the extent to which the new facilities can be afforded, and to report at the next meeting of the Com-

It was also directed that the Centroller should provide, if practicable, new dumping boards on the Battery in lieu of those now used at the foot of Verey-st., North River, the contractors being present and agreeing to the same.

On motion of the President of the Metropolitan Board of Health, the following preamble and resolutions were

of Health, the following preamble and resolutions were adopted:

Whereas, It is essential that correct information be supplied to this Commission as to streets, &c., in this city cleaned from day to day by the centractors in accordance with their contract, therefore, for the purpose of suggesting a plan by which the actual service rendered can be properly verified and the evidence of the same made to this floard, be it.

Resolved, That Messrs, Brown, De Voe & Knapp be and they are hereby requested to cause to be returned to the nearest Station-House in the merning before 9 o'clock of each day, a list of all the streets, lance, aromes, dooks and piers or parts of same which they may find fully swept or cleaned according to their contract during the 24 hours preceding.

Resolved, That the Metropolitan Board of Police be requested to cause such returns to be received and to direct an immediate inspection of the work performed to be made by a Sergeant, and if found correct to have the same indexed on the return, and the returns so indexed forwarded weekly to the Board with the name of the Sergeant, and if not properly performed, such omissions to be stated in like manner, to the end that such performance and omissions may be laid before this Board.

The Mayor who presented a letter from the contractors

The Mayor also presented a letter from the contractors of the same date, correcting a statement made in a previous letter that their foreman had reported the streets cleaned in the Sixth Ward to the Captain of that Precinct, and stating that they had ascertained that report was made verbally, but not in writing.

The Board then adjourned until Tuesday next at 3 o'clock

CITY NEWS.

GRAND OPERATIC CONCERT .- A grand concert by the artists of the Italian Opera Troupe takes place at St. Stephen's Church, East Twenty-eighth-st., to morrow eveningthe proceeds to be devoted to the enlargement of the church.

CHRISTIAN UNION.—The next Conference of the Christian Union Association will be held in the Rev. Dr. Rockwell's church, Brooklyn. The Rev. Jonas King, D. D., Missionary to Greece, and the Rev. Drs. Eelis and Rockwell, will speak. Prof. Schaff will preach in St. Mark's Church, at 71 p. m., and the Rev. Dr. Craven will occupy the Rev. Dr. Kreb's putpit in the morning.

THE SUPPOSED CHOLERA CASE .- A note from Corper Gover informs us that he had the testimony of two German physicians in regard to the death of Mary Heil, one of whom had been called upon to attend her, but did not arrive until after the woman had ceased to five. Their opinions, erroneous as they undoubtedly were, influenced the jury, and established the belief that the disease was that which was reported. He does not claim that the verifiet was correct, but we have no doubt the evidence adduced justified the decision renered. Subsequent development and better authority, however, have reversed the decision; and while we do not doubt the Coroner was conscientious in the discharge of his duty, the result caused a vast amount of needless alarm in many portions of the city, which would have been prevented if more caution had been used before any announcement whatever of the result was made.

A QUEER COMPLAINT .- William Woolfe, a merchant of Utica, N. Y., was vesterday arrested by Detective McCloud of the Thirteenth Precinct, on the complaint of Manasseh Goldman of No. 165 Atlen-st. The complainant states that on the evening of September 24, 1864, during his states that on the evening of September 24, 1664, during his temperary absence, Woelfe married his (the complainants) wife. Esther, and the following morning the newly married couple left for Utiea, taking with them all the furniture in the house, the property of the complainant, amounting in value to \$271, and a bank book showing a credit to the complainant of \$500 in the Bowery Savings Bank. Since the date mentioned above, the defendant and the wife of the complainant have been living together in Uties. Lately Woolfe came on to this city to buy goods, and was arrested on the complain of Goldman, as mentioned above. He was held to bail by Justice Mansfield to await an examination.

DR. MACGOWAN ON CONFUCIUS .- Dr. Macgowan, who has been a considerable traveler among the Chinese and other Eastern nations, delivered an interesting lecture before the Society for the advancement of Science and Art, at their room in the Cooper Institute last evening, on the life and doctrines of Confucius. The Doctor first sketched the diography of the distinguished Philosopher of the Celestiais, tracing his pedigree from the earliest mentioned ancestor of his family, probably a cotemporary of Abranau, down to the sage limediff. He related several traditional ancedotes of the hirthyouth and manhood of Confueurs, and of his political and philosophical experiences. Passing to the second part of his discourse, he then gave a comprehensive and perspicuous generalization of the social, moral and political teachings of the philosopher, and the influence which they have had upon the Chinese national life. The tecture was listened to with deep attention and evident interest by the asdience, and at its close a vote of thanks was ananimously voted to its action.

STEINWAY & SONS' GRAND, SQUARE AND UPRIGHT PIANO-FORTES

are now acknowledged the best instruments in America, as well as in Europe, having taken Thirty-two First Premiums, tiold and Silver Medals, at the Principal Fairs held in this country within the last ten years, and in addition thereto they were awarded a First Principal at the Great International

POWERFUL CLEAR, HRILLIANY, AND STEPATHERIC TONS, withex-cellence of workmenship as shown in Grand and Square Playos.
There were 789 Planos, from all parts of the world, entered for competition, and the special correspondent of The Times agra:
Mestr. STRINWAYS informents by the juror is emphatic, and atronger, and more to the point, than that of any European maker.
This greatest triumph of American Plano-fortes in England has caused a sensation in musical circles throughout the continent, and, as a result, the Mestr. STRINWAY are in constant receipt of orders from Europe, thus imagarating a new phase in the listory of American Plano-fortes, by creating in them an article of export.
Evers STRINWAY Playo Forts is WARRAYED FOR FUR YEARS.
Among the many and most vanishe important improvements introduced by Mestrs, Steinway & Sons, in their Plano-fortes,
THE SPECHA ATTENTION OF PERCURSARIES is directed to their
PATENT AGRAPPE ARRANGEMENT.
(For which letters patent were granted them Nov. 29, 1852.)
The value and importance of this invention having been practically tested, during a period of nearly six years, by Steinway & Sons, in all their Grands and highest priced Square Plano-fortes, and admitted to be the greatest improvement of nodern times, they now announce that they have determined to introduce their "Paient Agrade Arrangement" in early Plano-forte mana/actured by thes, without in every Plano-forte mana/actured by thes, without in the plano and the plano

A STEINWAY PIANO-FORTE

A STEIN VIEW IN PREFERENCE TO ALL OTHERS.

First—The fact that they have been awarded the First Premium on the Europe and America by the most competent and inflexible udges.

SECOND—The fact that all their "scales, improvement and peculiarlies of construction" have been copied by a large majority of the manafacturers of both hemispheres as closely as could be done without in imprenent of patent rights; thus admitting their reast superiority over all others.

fringement of patent rights, thus admitted their cast superactly over all others.

THIRDLY—The fact that a large number of manufacturers and "Associations" profess to make plann-fortes exactly like Steinnessy' or to have been in their employ as foremen or workmen, thus conceding their excellence in claiming an indersement for their own instruments. Forgraix—The fact that while the majority, of the smaller makers manufacture their pianos in several separate shops and purchase the actions, some also the keyboards, and even the cases for their instruments, ready made, every portion of a "Steinway" Piano, from its inclining under the immediate personal superintendence of the Messrs, Steinway, father and three sons, thus insuring perfect uniformity and univiside excellence.

Steinway, father and three sons, thus insuring perfect uniformity and unrivated excellence.

FITHIN—The part that that no Piano-forte with the slightest possible defect is ever permitted to leave the manufactory, and that every Steinway instrument is scarroarded for Fire Years.

SETHIN—The fact that in purchasing a Piano-forte the established reputation of its maker should be relied on as strongly as its apparent quality, and far more than its first costs.

SETHIN—The immense working capital employed, which commands alike the choice of labor, the employment of the most skill-fal artisans, the selection and accumulation of materials of all kinds, and the thorough and lengthened seasoning process to which the lamber is subjected.

ind artimans, the selection and accumulation of materials of all kinds, and the thorough and lengtheous desconing process to which the lumber is subjected.

Enouthky—The fact that the un-rampled success achieved by Sprinway & Sons Plano Fortus, in spite of all and every opposition, is admitted to be owing to their stering and lasting qualifies, which stand alike the text of time and trial.

NINTHLY—The fact that the majority of the most eminent artists of Europe, and with but few exceptions the most celebrated planists resident in America, prefer them for their own private and public use whenever they can obtain them, and their testimony is overwheiming, as will be seen by the following certificate:

TESTIMONIAL OF THE MOST DISTINGUISHED ARTISTS TO STEINWAY & SONS.

NEW YORK, December, 1884.

The Plano-fortes, Grand, Square and Unright, manufactured by Mesars, STRINWAY & SONS, have established for themselves so werful wide a reputation that it is hardly possible for us to add anything to their just fame.

Having thoroughly tested and tried these instruments personally for years, both in public and private, it becomes our pleasant ducy to express our candid cognition regarding their uniform excellence are: Greatest possible depth, richness and seleme of tone, combined with a rare brilliancy, clearness and perject exemise throughout the eatier same, and, whore all, a surprising duration of wond, the pure und sympathetic quality of which neere changes under throughout the eatier same, and, shore all, a surprising duration of wond, the pure und sympathetic quality of which neere changes under the most definition or powerful touch. This peculiarity is found exclusively in the STRINWAY Finno, and together with the matches precision, elasticity and promptness of action always characterizing these instruments, as well as their unique, decayed duration and concepts the development of every artist. We therefore consider the STRINWAY Finno, and in respects the best host course of powerful touch. This peculiarity is found

Perfect, and recomment.

We have at different times expressed our opinion regarding the Planes of various makers, but freely and unhesitatingly pronounce Mears, Symptom Various was planes in the mail.
